Commander
U.S. Army Corps of Engineers
Huntington District
Attn: ORHOP-R/Pat Cantley
P.O. Box 59
Louisville, KY 40201

Dear Mr. Cantley:

The results of the 1987-1991 gypsy moth trapping program conducted at 14 Army Corps of Engineers sites within the Huntington District are enclosed for your information (Table 1). The purpose of the program is to monitor low level gypsy moth populations and to help us determine when more quantifiable survey methods should be employed.

Gypsy moth populations are still extremely low at all of these sites. No moths were caught at 8 sites; however catches ranged from 1-14 moths at 6 other sites. A map showing trap locations is enclosed for those 6 sites (Figures 1-6). Based on these results, gypsy moth populations should not have any significant impact at any of these sites in the immediate future. We would like to see the trapping continued at all of these sites in 1992.

Thank you for your continued cooperation and if you have any questions regarding these results, please call me at (304) 285-1556.

Sincerely,

Karen D Felton
